

PRODUCT DATA

Fal-SUL1000

Description	Fal-Sul1000 is a catalyzed sodium based compound, which
And use	reacts with oxygen to form sodium sulphate. Protecting the Boiler from corrosion problems. It also contains Anti scaling Polymer and a neutralizing amine to prevent scale formation And to protect the condensate line as well.
General	Appearance : Colorless liquid
Description	pH : 4.0 (5.0 in solution)
	Specific gravity : 1.10
	Odor : Sulphide odor
Treatment	The optimum dosage for Fal- Sul1000 depends on boiler
And Dosage	pressure, temperature and other operating conditions.
Requirement	The optimum treatment level will be specified by your Falcon Representative to ensure the maximum program performance. Fal-Sul1000 is normally diluted and injected by means of A dosage pump or a dosage pot as appropriate to the particular Plant.
